

GoodDeed

Head wants you to build an application for tracking the good deed done by different campus minds.

So generate the rest apis for the following scenario.

GoodDeed

-goodDeedId

-goodDeedName

-@OneToOne

Supervisor supervisor

-@OneToMany

List<CampusMind> campusMinds

CampusMind

-mid

-name

-@ManyToOne

GoodDeed goodDeed

Supervisor

-supervisorId

-supervisorName

-@OneToOne

GoodDeed goodDeed

Q1.Assign a good deed to a campus mind.

Q2.Display all campus minds for a particular good deed.

Q3.Display all good deeds with less than 3 campus minds.

Q4.For a particular supervisor display its gooddeed and campus minds under him.
