

Ticket Tracking System

Orchard Head wants to track all the genie raised by campus minds. Help him by building a robust application based on the given scenario.

CampusMind	Genie
-mid	-genieId
-name	-genieDescription
-projectName	-genieStatus(Boolean)

Each campus mind can raise many genies(@OneToMany).

- 1.Add campus mind only.
- 2.Raise a genie for a campus mind by passing campus mind's mid using path variable/Request param.
(Throw InvalidMidException if mid is not found)
- 3.Display all the genie raised by a campus mind whose status is true.
(Hint :Use findById())
- 4.Change the status for a particular genie id.(use path variable).
(Throw InvalidGenieIdException if genie id not found)
